PROFESSIONAL SUMMARY

Information Technology graduate (University of Batangas, June 2026) with full-stack development experience across three end-to-end projects, including On-the-Job Training at Rakso CT. Skilled in building desktop and web applications using React, Electron, PHP, and MySQL, with strong grounding in systems analysis, database design, and secure authentication. Proven ability to take a project from requirements gathering through deployment, backed by seven industry certifications, including AWS Certified AI Practitioner.

CORE SKILLS

- Web Application Development • Authentication & Authorization
- Database Design • REST APIs • Desktop Application Development
- Systems Analysis • Git Version Control • Agile Methodologies

TECHNICAL SKILLS

Languages & Databases: PHP Laravel, Java, JavaScript, SQL, HTML, CSS, MySQL

Frameworks & Tools: React Native (Expo), React, Electron, Express, GitHub, VS Code, MS Office, Node.js

Systems Analysis & Modeling: ERD & DFD Modeling, System Workflow Analysis, Requirements Analysis (RAD)

Professional Competencies: Agile development, technical documentation, requirements gathering, testing & validation, team collaboration

WORK EXPERIENCE

IDEase | Full-Stack Developer (On-the-Job Training) Rakso CT, Makati, Philippines

Team Project | Feb 2026 - April 2026

- Developed a cross-platform desktop application used to design and print ID cards, reducing manual design and printing time for end users.
- Built and maintained the backend using Express and SQLite, handling all local data storage and retrieval for the application.
- Executed QA testing on the company website, identifying and documenting critical bugs.
- Collaborated with a development team using version control and iterative testing to deliver functional features on schedule, gaining direct exposure to professional software development workflows.

Technologies: React, Electron, Express, SQLite, Git

PROJECT EXPERIENCE

SmartWaste | Full-Stack Developer | Batangas, Philippines

Team of 3 | June 2025

- Developed a web-based smart waste management system with role-based access control, enabling administrators and users to manage waste collection through distinct, permission-based interfaces.
- Designed and implemented the backend and relational database architecture using PHP and MySQL, structuring data to support multiple user roles and workflows.

Technologies: PHP, MySQL, HTML, CSS, JavaScript

UBuyandSell | Full-Stack Developer | Batangas, Philippines

Team of 3 | Oct 2024 – Dec 2024

- Developed a full-stack campus marketplace platform enabling students to securely list, browse, and purchase items within the university community.
- Implemented OTP-verified authentication to protect user accounts and transactions from unauthorized access, strengthening platform trust and security.

Technologies: PHP, MySQL, HTML, CSS, JavaScript

EDUCATION

Bachelor of Science in Information Technology

University of Batangas — Batangas City | Graduated: June 30, 2026

CERTIFICATIONS

- AWS Certified AI Practitioner (2026)
- AWS Academy Graduate – Generative AI Foundations (2026)
- AWS Cloud Quest: Generative AI Practitioner (2026)
- CompTIA IT Fundamentals+ (ITF+) (2025)
- AWS Academy Graduate – Cloud Architecting (2025)
- AWS Cloud Quest: Cloud Practitioner (2025)
- Introduction to Cybersecurity – Cisco (2023)
